OBJECTIVE

As a determined individual who has made a bold career switch into Full Stack Web Development, I am thrilled to bring my passion and eagerness to your team. Collaborating alongside experienced developers to create innovative and impactful web applications is a thrilling prospect for me, and I am eager to take on the challenge.

EDUCATION

Full Stack Boot Camp
University of Texas at Austin
October 2022 – April 2023

South Robeson High School
Rowland, NC
August 1995 – June 1999

KEY SKILLS

Git
React
Node.js
MongoDB
Tailwind CSS
JavaScript
HTML5
CSS3
MySQL
jQuery
Microsoft Office

EXPERIENCE

Store Room / Food Service
Texas Children's Hospital The Woodlands
The Woodlands, Texas

May 2022 – March 2023

My role is part-time and includes unloading trucks on the docks for the food and nutrition department. Temperature and packaging qualities are held to specific standards and my job is the kitchen's first line of defense for rejecting non-compliant items.

Electronic Repair Technician Lead
Tech Data, Columbus, OH

November 2018 – May 2021

Serving in the Philips CPO area repairing servers and CT collimators. Running quality tests on multiple devices including CT system testing, iCT and A-Plane Collimators, image reconstruction servers, and power inverter boards. Trained and assisted in training co-workers in various tasks and documentation as to qualify them for the jobs they would be performing.

Computer Repair Technician
The Affordable Geek, Fayetteville, NC

April 2017 – February 2019

Diagnose and repair/replace computer hardware and software. Troubleshoot Windows software errors that may require re-installation of OS or repair fixes. Reconfigure network settings for LANs. Replacing broken LCD screens on laptop computers, cell phones and tablets.
